90% Pearl	6.50	7.50	8.50	4.

The price and quality of the "PENSEL PEN" compares very favorably with other well known pens. Nevertheless, the PENSEL PEN COMBINATION is sold at the price of a pen alone. In addition, we can safely state that our product is without an equal in efficiency, workmanship, and serviceability.

The "Penselpen" (Patented)

The Pen and Pencil combined as a unit is more efficient than a separate pen and pencil. By actual test it has been found 30% more efficient as a time saver.

The Ink Feeding Device

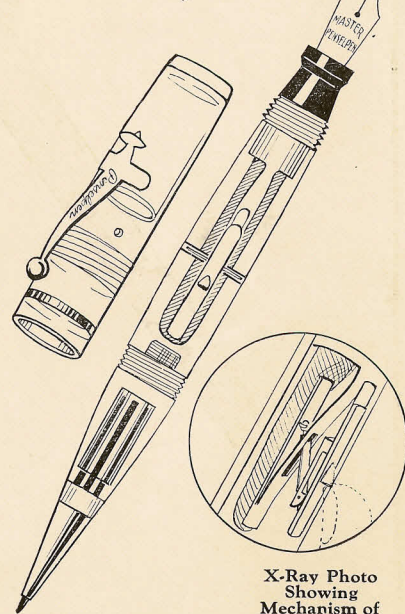

also patented by Mr. Schnell, controls every drop of ink, thereby preventing blotting and smearing. With it the pen is always ready to write the instant the point touches paper.

Aeroplane Design Clip (Patented)

is in addition to its artistry, the most serviceable clip made, both from the standpoint of durability and security with which it holds the pen in the pocket.

Note the Patented Slide Filling Device

The simplest and surest of any device ever invented for a fountain pen. Expels ALL the air out of the rubber sack and in consequence draws up more ink than any other pen of equal sized barrel.

Forty years of experience has taught us how to make the best pen possible. Never leaks - never blots. EVERY PEN IS FULLY GUARANTEED AGAINST ANY MATERIAL OR MECHANICAL DEFECT.
